International Investment Funds Limited

High Income Fund 31 December 2024

Objective and policy from the Prospectus

To seek a high income from a spread of fixed interest securities.

The investment policy aims to support the payment of dividends above the level of short term sterling interest rates. This policy may result in a gradual reduction in the capital value of the shares. The Fund will normally hold a relatively wide range of securities in order to keep a low level of exposure to individual bond issues other than government securities. The Fund may also hold a substantial part of its assets in bank deposits from time to time. The Fund may invest in securities denominated in currencies other than sterling. The current policy of the Directors is that the investments in non-sterling denominated securities should be fully hedged against sterling with the aim of eliminating the effects of any exchange rate movements.

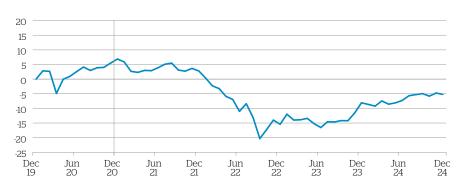

Kev Facts

110 y	1 0.0 .0
Inception date	Jun 1995
Investment Manager Change	Dec 2020
Number of holdings (incl. cash)	68
Base currency	Sterling (£)
Share class	Income
Minimum investment	£5,000
Fund size (£ m)	99.92

Past performance is not a reliable indicator of future results. Sources: Fund performance and benchmark data is provided by Financial Express (FE).

The performance shown above is for total return, net of all ongoing charges, priced at NAV in sterling (£). The benchmark performance is shown without the deduction of charges and fees.

Risks

The value of investments and the income from them can go down as well as up and cannot be guaranteed. Investments in a currency other than the shareholder's own currency, or in a fund that invests in securities denominated in currencies other than its own base currency, will be subject to the movements of foreign exchange rates, which may cause an additional favourable or unfavourable change in value. Consequently, investors may, on selling their shares, receive an amount greater or less than their original investment. Collective investment funds are generally medium to long-term investments.

'Distribution Yield: This is the amount that is expected to be distributed over the next 12 months as a percentage of the fund's share price on the date shown. It does not include the deduction of entry charges and is the gross return before tax on distributions. You may be subject to further tax on your distributions. The yield is not guaranteed.

²Yield to Maturity: The total rate of return anticipated on a bond if it is held until maturity, expressed as an annual rate. The calculation assumes that all coupons are reinvested at the same rate. At fund level, it is a weighted average of the contributing securities at the same rate and does not include fees and charges.
