

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

### Canaccord Wealth International Multi Strategy Funds Limited - Cautious Balanced Strategy - B Class (the 'Fund')

ISIN GBO0B02F7903

The Manufacturer of the Fund is Canaccord International Fund Managers Limited (the Manager)

Telephone +44 (0) 1534-715555 The Fund and the Manager are authorised and regulated by the Jersey Financial Services Commission.

Date of Production 14/02/2025

## What is this product?

The Fund is a sub fund of Canaccord Wealth International Multi Strategy Funds Limited, a non UCITS open ended investment company. There is no fixed term or maturity date. It is classified as a fund of funds which is a fund that invests in a number of other funds. Fund Class launch date: 14/09/2004.

The objective is to seek to provide long-term capital growth through investment in a well-diversified portfolio of funds investing across the capital markets with a low level of volatility over the medium to long term. This Fund operates a cautious investment strategy where equity exposure is limited and likely to range from 30% - 55%.

The policy of the Fund is to invest in collective investment funds managed by a range of carefully selected fund managers. These underlying funds, in turn, invest across the capital markets in asset classes including bonds, equities, properties, commodities and cash. The Fund may also hold cash deposits to enable Shares to be repurchased or for the efficient management of the Fund.

This Fund may be suitable for investors whose requirements align to the objectives and policies of the Fund, who have sterling as their reference currency and are willing to invest for a minimum of five years, preferably ten years. The Fund can be terminated without the agreement of shareholders if the value of the Fund is less than £5,000,000 or currency equivalent for a period of four consecutive weeks. Shareholders will be given at least three weeks' written notice of any such action.

## What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk and volatility of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or the type of underlying assets in which the Fund invests.

The risk indicator assumes you keep the product for a minimum of five years.

The actual risk can vary significantly if you sell your shares early, you may get back less than you originally invested.

The base currency of the Fund is sterling. It can invest in securities denominated in currencies other than sterling so can be affected by currency fluctuations which may affect the return. The return from investing in a fund denominated in a currency other than the currency of your residence or domicile may be affected by currency fluctuations. Dividends, which will be automatically reinvested in shares of the Fund, are not guaranteed and the amount you receive may fluctuate.

The value of investments and the income from them can go down as well as up and cannot be guaranteed. This product does not include any protection from future market performance so you could lose some or all of your investment. Past performance is not an indicator of future performance. Additional risk information is included in the Risk Warnings section of the prospectus.

## Investment performance information

The Manager has given discretion to the Investment Manager to actively manage the assets held by each Fund and this may change without notice to shareholders. The exact allocation or weighting of the assets of each Fund between the various asset classes will be decided by the Investment Manager as will the selection of the underlying funds and will vary depending on the risk profile and investment objective of each Fund. The Funds are managed according to their risk profile and investment objective and each Fund carries a risk of loss to capital value and/or return particularly in the short to medium term but with potential for growth over the medium to long term. The level of risk for the Cautious Balanced Strategy is modest. Typically, higher growth potential is associated with higher volatility and risk. A suitable benchmark or proxy has been chosen in order to provide a comparator for information purposes. The relative performance will differ for a number of reasons and is not a reflection of how the Fund will perform. Past performance is not a reliable indicator of future results. Under severe market conditions the value of the investment may be adversely impacted, and you may not get back the amount of your initial investment. This investment is a medium/long term investment and should be held for the recommended holding period.

## What could affect my return positively?

The aim of the Cautious Balanced Strategy is to achieve a modest return, the factors that influence your rate of return positively include, positive market performance, low interest rates, favourable currency fluctuation, government policy or the health of the underlying economy.

## What could affect my return negatively?

The aim of the Cautious Balanced Strategy is to achieve a modest return, the factors that influence your rate of return negatively include, negative market performance, rising interest rates, unfavourable currency fluctuation, government policy or the health of the underlying economy. Investing for less than the recommended period may also impact your return.

## What happens if Canaccord International Fund Managers Limited is unable to pay out?

In the event of the default of the manager or custodian of the Fund, limited protection is provided under the Collective Investment Funds (Recognized Funds) (Compensation for Investors) (Jersey) Regulations, 1988. The maximum compensation payable to any one investor is £48,000 and is dependent upon the size of the investment. The total amount of compensation in any one year is limited to £5,000,000. Please refer to the prospectus for further information.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest £10,000. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

| Investment £10,000              |                             |                              |                           |
|---------------------------------|-----------------------------|------------------------------|---------------------------|
| Scenarios                       | If you cash in after 1 year | If you cash in after 3 years | If you cash in at 5 years |
| Total costs                     | £171                        | £518                         | £871                      |
| Impact on return (RIY) per year | 1.67%                       | 1.67%                        | 1.67%                     |

## What are the costs? (continued)

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.

This table shows the impact on return per year

|                  |                             |       |  |
|------------------|-----------------------------|-------|--|
| One-off costs    | Entry costs                 | 0.00% | The impact of the costs you pay when entering your investment.                           |
|                  | Exit costs                  | 0.00% | The impact of the costs of exiting your investment when it matures.                      |
